Day -5

Lifecycle
App.js

```
import React from 'react'
import'./project/lifecycle'
import Apped from './project/lifecycle'
export default function App() {
  return (
    <Apped/>
  )
}
```

Lifecycle.js

```
import React, { useState } from "react";
function Apped()
{
  const[count,set]=useState()
  return(
 <div>
    <button onClick={()=>set("Pos")}>pos</button>
    <button onClick={()=>set("user")}>user</button>
    <button onClick={()=>set("comment")}>comment</button>
    <h1>{count}</h1>
 </div>
  )
}
export default Apped;
```

output

user
